La perfetta imperfezione

Affondano nella nobile tradizione vetraria veneziana le radici di AVMazzega, fondata nel 1946 da Gianni Bruno Mazzega a Murano, terra di fornaci, di maestri, serventi e serventini che ancora oggi custodiscono secolari tecniche di lavorazione del vetro.

In oltre mezzo secolo AVMazzega, senza tradire le proprie origini, ha ravvivato e reinterpretato con passione e tenacia l'eredità muranese, invitando designers internazionali dagli eterogenei linguaggi espressivi a confrontarsi con le alchimie di sabbie, ossidi e polveri.

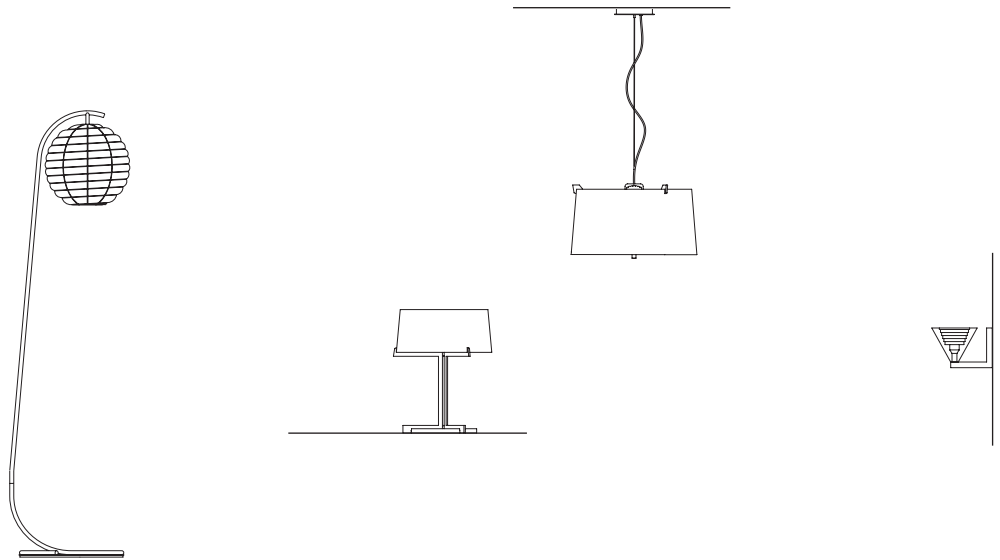

Il risultato è una sorprendente proposta di lampade in vetro che si confrontano con la contemporaneità in vibrante equilibrio tra arte ed industria, tradizione e modernità.

Perfect imperfect

The roots of AVMazzega lie in the noble Venetian glassworking tradition; the firm was founded in 1946 by Gianni Bruno Mazzega in Murano, a land of furnaces, masters and their assistants in the glassmaking process, known as “serventi” and “serventini”, who still today guard the age-old techniques for working the glass. In over half a century AVMazzega, without betraying its origins, has revived and reinterpreted the Murano heritage with passion and tenacity, inviting international designers with heterogeneous expressive languages to take on those alchemies of sands, oxides and powders.

The result is an amazing proposal of blown glass lamps that interact with contemporaneity, in vibrant equilibrium between art and industry, tradition and modernity.

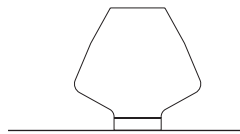

Designers

AVMazzega accompagna l'evolversi del gusto dell'abitare con una ragionata attenzione al mondo del design e della sperimentazione formale: numerosi designers collaborano con AVMazzega attivando competenze e relazioni che sono all'origine di oggetti entrati nella storia del vetro moderno; tra gli altri, Christophe Pillet, Michele DeLucchi, Jean Marie Massaud, Paolo Piva, Anki Gneib, Gordon Guillaumier e Nigel Coates.

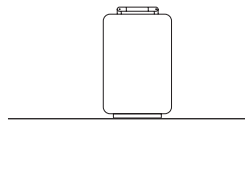

www.modulelectro.ru

Designers

AVMazzega attentively follows changes in lifestyles and trends and is thus sensitive to design and formal experimentation: many designers have cooperated with AVMazzega, and this expertise and commitment have resulted in items that have become part of the history of modern glass. Among the others: Christophe Pillet, Michele DeLucchi, Jean Marie Massaud, Paolo Piva, Anki Gneib, Gordon Guillaumier and Nigel Coates.

Per cielo, per terra, per mare

Grandi numeri, richieste speciali, ma anche realizzazioni ad hoc progettate dallo staff di Tecnici e progettisti di AVMazzega, in piena sintonia con l'immaginazione del committente.

Da semplici variazioni cromatiche, passando per lievi modifiche fino a vere e proprie soluzioni su misura, il grado di personalizzazione del servizio Contract è pensato per inseguire i sogni di progetti illuminotecnici che hanno intuito e sfruttano la duttilità e la magia del vetro.

Gli oggetti illuminanti AVMazzega viaggiano così per cielo per terra e per mare dialogando da protagonisti con spazi pubblici, alberghi, ristoranti, navi da crociera, aeroporti, musei, luoghi d'attesa.

By air, land and sea

Large numbers, special requests, but also ad hoc creations designed by the staff of technicians and designers at AVMazzega, fully in tune with customers' imaginations.

From simple chromatic variations, through slight modifications up to genuine made-to-measure solutions, the degree of personalization of the Contract supplies service is designed to pursue the dreams of lighting engineering projects that have the insight to exploit the ductility and magic of glass.

AVMazzega lighting objects therefore travel by air, land and sea, in a dialogue as protagonists with public spaces, hotels, restaurants, cruise ships, airports, museums and waiting areas.

Note Notes

AVISO: Le immagini e le descrizioni del presente catalogo si intendono a titolo indicativo e non impegnativo. AVMAZZEGA si riserva la facoltà di modificare in qualunque momento e senza preavviso i prodotti illustrati nel presente catalogo, ferme restando le loro caratteristiche essenziali. I colori dei vetri sono suscettibili di piccole variazioni di tonalità, data la lavorazione artigianale. Tutti i materiali sono omologati CE. Su richiesta è possibile ottenere omologazioni diverse quali UL, SASO, ENEC. AVMAZZEGA è iscritta al consorzio Ecolight; il relativo feed viene da noi onorato, anche quello a carico del cliente. © E vietata, salvo espressa autorizzazione scritta, la riproduzione anche parziale di questo catalogo e dei suoi contenuti in tutte le sue forme, anche elettroniche. Qualora venga concessa la preventiva autorizzazione è fatto obbligo citarne la fonte. Il presente catalogo elimina e sostituisce i precedenti.

ATTENTION: Images and descriptions of this catalog is construed as an indication and not binding. AVMAZZEGA reserves the right to change at any time and without notice the products or accessories shown in this catalog, without prejudice to their essential characteristics. The colors of glass are susceptible to small changes in tone, given the hand-crafted. All materials are CE approved. On request it is possible to obtain various approvals such as UL, SASO, ENEC. AVMAZZEGA Ecolight enrolled in the consortium, its feed is honored by us, even those borne by the customer. © It is forbidden, without the express permission, the partial reproduction of this catalog and its contents in all its forms, including electronic. If prior authorization is granted, this shall cite the source. This catalog annuls and replaces the previous ones.

Marchi Marks

Classe I

Overo apparecchio provvisto di isolamento fondamentale in ogni parte e con parti conduttrici accessibili collegate ad un conduttore supplementare di protezione (messa a terra).

Classe I

appliance fitted with basic insulation throughout and with accessible live parts connected to a supplementary safety circuit (ground).

Classe II

overo apparecchio provvisto di doppio isolamento o isolamento rinforzato senza dispositivi per la messa a terra.

Class II

appliance fitted with double insulation or reinforced insulation without ground connection mise à la terre.

Classe III

overo apparecchio previsto per il funzionamento a bassissima tensione di sicurezza (12V), che non necessita del cavo di terra.

Class III

appliance designed for extra low safety voltage operation (12V), not requiring an earth lead.

Lampadine a basso consumo energetico
Low-energy consumption bulbs

* Gli asterischi a fianco del codice prodotto
** si riferiscono al tipo di lampadine utilizzabili
*** The asterisks next to the product code
**** refer to the type of light bulb that can be used
