Il lampadario a Murano / The Murano chandelier

Fin dai suoi esordi a Murano, negli anni '40 dello scorso secolo, la de Majo Illuminazione ha indirizzato la propria attenzione e il talento dei suoi maestri vetrai verso la produzione dei lampadari classici, accumulando nei decenni un'esperienza e una sapienza produttiva che ancora oggi è in grado di mettere al servizio delle proprie realizzazioni. È indubbio che, da alcuni anni, il lampadario classico veneziano sia stato rivalutato come elemento non solo illuminante, ma ancor più d'arredo poiché gli sono universalmente riconosciute versatilità e adattabilità assolutamente ineguagliabili. È vero altresì, (caratteristica straordinaria del vetro di Murano) che il lampadario classico ha saputo rinnovarsi proponendosi attraverso il talento di designers e maestri vetrai in nuove interpretazioni e, pur non rinunciando alle lavorazioni classiche, ha saputo divenire espressione di design attuale e di buon gusto. Dalla consapevolezza che il lampadario può essere protagonista in un arredamento, deriva la necessità di consentirne la personalizzazione, pertanto le forme, misure e colori di tutti i lampadari del presente catalogo possono essere variati a piacimento dell'utente e laddove si renda necessario, la de Majo è in grado di realizzare progettazioni speciali uniche ed inedite che rappresentano il massimo livello della sua produzione. Sono lampadari che abbelliscono case, palazzi, ville, alberghi in tutto il mondo che la de Majo Illuminazione, come nel lontano 1947, continua a produrre a Murano affidandone l'esecuzione a maestranze altamente qualificate e la progettazione ai propri creativi interni, dotati non solo di un raro bagaglio di esperienza, ma anche di buon gusto, cultura e finezza estetica, doti indispensabili per un risultato d'eccellenza.

de Majo Illuminazione, since the 1940's when the company was first set up in Murano, has focused the talent and expert skills of master glassmakers on creating classic chandeliers acquiring over the years experience and expertise which, still today, can be seen in the range of lighting solutions offered. It is without doubt that the classic Venetian chandelier, over recent years, has been reinterpreted not only as a lighting source, but reconsidered as a furnishing feature thanks to its versatility adapting perfectly to any context. Another important quality (an exceptional characteristic of Murano glass) is that the classic chandelier has been rethought thanks to the talent of designers and master glassmakers offering the market a new vision without losing sight of traditional glassmaking methods, a classic product transformed to satisfy contemporary design and appeal. Aware that the chandelier can become a focal feature, these lighting solutions can be personalised, therefore the models, sizes and colours of all the chandeliers in this catalogue can vary depending on specific customer requirements and if requested, de Majo offers unique and exclusive design projects, representing the excellence of this company. Chandeliers which enhance homes, palaces, villas and hotels worldwide and which de Majo Illuminazione, continues to produce, since 1947, in Murano by skilled and expert glassmakers and designed in-house by the company's creative team all of whom not only have specialist experience, but good taste, culture and an appreciation for a refined appeal, indispensable qualities and skills to achieve excellence.

Vivaldi / design Francesco Dei Rossi

ELECTRO
www.modulelectro.ru

Vetro disponibile nei colori: viola e cristallo, rosso e cristallo, nero e cristallo, lattimo e cristallo. La caratteristica di questa serie consiste nel castello centrale dell'apparecchio formato da pastorali in colore cristallo illuminati da lampadine alogene o led. Si crea così un nucleo di luce oltre all'illuminazione dei bracci.
Available in violet and clear glass, red and clear glass, black and clear glass, milkwhite and clear glass. The distinctive feature of this model is the central "fountain" of clear glass "pastorali (crossiers) lit either by halogen lights or led which provide an additional light source to the bulbs on the arms of the chandelier.

I Quattro Elementi / The Four Elements

design Roberto Assenza, Francesco Dei Rossi

Da quando Empedocle di Agrigento fissò nei quattro elementi, Terra, Acqua, Aria e Fuoco, il campo di indagine sufficiente per comprendere i meccanismi che regolano la materia, l'umanità non ha smesso di interrogarsi intorno a questi temi. La speculazione filosofica, unita alla scienza dei numeri della scuola Pitagorica, razionalizzando lo studio della fisica e della matematica, posero le basi della moderna Scienza Europea. Platone concepì anche un mondo superiore, perfetto, aggiungendo un quinto elemento, l'Etere, a cui il mondo sub-lunare, imperfetto, tenderebbe, aprendo così un campo di indagine che andava oltre la semplice osservazione materiale delle cose. Egli associò a ciascun elemento anche un solido geometrico a rappresentarne le caratteristiche.

Chiunque vada in una fornace a Murano, credo possa rivivere la magia della trasmutazione della materia. E se non è la pietra filosofale che cercavano gli alchimisti, la tradizione del colore a Murano contiene ancora questo aspetto quasi magico, stupefacente, nell'ottenere, mescolando nelle dovute proporzioni, alla sabbia altri elementi che trasformano la stessa in vetro la cui gamma cromatica è pressochè infinita. Il lampadario "I Quattro Elementi", Ideato e realizzato da Roberto Assenza e Francesco Dei Rossi, è stata un'occasione per confrontarsi sul tema del lampadario veneziano che vuole darsi anche come mezzo espressivo di un'arte sofisticata ma a volte fin troppo usurata. Lo sforzo è stato quello di rendere riconoscibili i concetti senza cadere in un eccessivo descrittivismo; di raggiungere l'obiettivo dell'idea essenziale delle caratteristiche di ogni singolo elemento attingendo a piene mani dalla tradizione muranese. La scansione verticale dell'esposizione segue uno dei concetti che regolano il disporsi degli elementi. Partendo dall'elemento Terra, il più statico di tutti, sede dei regni minerale, vegetale ed animale, materna e nutriente, alla cui base stanno i cinque solidi Platonici. A seguire l'elemento Acqua, nel suo continuo scorrere ed evaporare per poi ricadere ancora sulla terra, fecondandola. L'Aria, la linea di demarcazione tra la terra e il cielo, il soffio vitale che genera le trasformazioni. Il Fuoco, il primo elemento superiore, il più leggero e mobile, l'unico in grado di trasmutare i metalli. Il fuoco rubato da Prometeo agli Dei e da cui iniziò la storia dell'umanità. All'apice la stella Pitagorica, racchiudente nei suoi rapporti geometrici il magico Numero Aureo, il numero della proporzione e dell'armonia universale; qui inteso come semplificazione del Platonico dodecaedro stellato, raffigurante il quinto elemento, la quintessenza, l'Etere.

Since Empedocles, citizen of Agrigentum, developed his belief that all matter was composed of four elements Earth, Water, Air and Fire mankind has never stopped questioning these themes. The philosophical speculation combined with Pythagoras' theorem rationalised the study of physics and mathematics creating the base of modern European Science. Plato endowed the idea of the real existence of a perfect world superior to the world we see, imperfect, adding a fifth element, Aether, which went beyond the simple study of the material matter of things. He associated a solid geometric form to each of the elements representing their characteristics.

Whoever visits the furnaces on the island of Murano relives the magic of seeing matter transmute. And if it is not the philosophical stone sought by the Alchemists, the tradition of colour on Murano still today contains this almost magical appearance, astounding, by blending in the right measures other elements to sand transforming it into glass with an almost infinite range of colours. Created by Roberto Assenza and developed together with Francesco De Rossi, the luminaire "The Four Elements" revisits the theme of the Venetian chandelier translated into an a form of sophisticated artistic expression which at times can be overly exaggerated. The effort was focused on making the concepts recognisable without falling into the trap of being overly ornate, achieving an objective, the essential idea of each detail by drawing on the Murano glassmaking tradition. The vertical configuration follows one of the concepts which regulates how the details and features are arranged. Beginning with the Element Earth, the most static of all the elements, the kingdom of minerals, vegetation and animals, motherly and nutritious, and base of the five Platonic solids. Water follows, with its continuous flow evaporating to fall again on the earth making it fertile. Air, this element creates the dividing line between the earth and the sky, that vital breeze that transforms. Fire is the first of the superior elements, the lightest and most free moving, the only with the power to transmute metal. Fire stolen from the Gods by Prometheus is the beginning of humankind. At the apex the Pythagorean star which encloses in its geometry the magic Golden Section, the number identifying universal proportion and harmony intended as a simplification of the starred Platonic dodecahedron representing the fifth element, the quintessence, Ether.

design Maria Grazia Rosin

La collezione di lampadari disegnati da Maria Grazia Rosin raffigura al meglio il ruolo che il Vetro di Murano interpreta come espressione della produzione contemporanea.

Attingono infatti a piene mani dalla tradizionale lavorazione artistica, avvalendosi pertanto della grande perizia del Maestro Vetraio, e contemporaneamente esprimono una interpretazione completamente nuova, modernissima ricca di connotati e sensibilità artistiche ormai universalmente riconosciute a Maria Grazia Rosin.

The collection of chandeliers designed by Maria Grazia Rosin best embodies the role that Murano glass plays as expression of the contemporary production.

The chandeliers encompass traditional artistic experience and the precise craftsmanship of the Master Glassblower whilst, at the same time, expressing the most innovative and modern interpretation, full of distinctive characters and the artistic sensitiveness universally attributed to Maria Grazia Rosin.

Cosmospora

Lampadari ed appliques con elementi nei colori rosso, cristallo e cristallo sabbiato. I lampadari non sono forniti di prolungamento catena con rosone.
Chandeliers and wall lamps in red, clear glass and frosted. For these chandeliers chain and canopy are not supplied.
