ALABASTER

 **LEDS-C4**

## LA PIEDRA NATURAL COMO DIFUSOR DE LA LUZ

LEDS-C4 fusiona la innovación tecnológica con el arte de la escultura.

Reforzada, pulida y barnizada, la piedra de alabastro combinada con una cálida iluminación interior, ofrece unas posibilidades de aplicación infinitas. Las particulares características translúcidas de este material tamizan y difuminan la luz para eliminar el efecto duro y a veces frío de la luz directa. Las vetas y las aguas de cada piedra convierten a cada pieza en única proporcionando un aspecto de lujo, noble y cálido.

El riguroso proceso desarrollado por LEDS-C4 para la elaboración de la piedra de alabastro permite disponer de un material de excepcional calidad y gran distinción. Pues la extracción se hace, en general, a cielo abierto, con sistemas no agresivos para proteger la integridad del material.

Los productos de este catálogo, como todos los productos de LEDS-C4, siguen un estricto control de calidad avalado por la certificación **ISO 9001** y por la **ISO 14001**, que ratifica la garantía del sistema de gestión ambiental de LEDS-C4.

## NATURAL STONE AS A DIFFUSER OF LIGHT

LEDS-C4 blends technological innovation with the art of sculpture.

Reinforced, polished and varnished, alabaster combined with warm interior lighting offer infinite applications.

This material's special translucent characteristics filter and diffuse light to eliminate the harsh and sometimes cold effect of direct light. Each stone's streaks and ripples make each piece unique by giving it a luxurious, noble and warm appearance.

The rigorous process developed by LEDS-C4 for working alabaster means that we have a material of exceptional quality and distinction. This is because the alabaster is mined from an open pit with non-aggressive systems in order to protect the material's integrity.

The products in this catalog, like all LEDS-C4 products, follow a strict quality control backed by **ISO 9001** and **ISO 14001** certification. These standards affirm LEDS-C4's environmental management system.

## LA PIERRE NATURELLE COMME DIFUSSEUR DE LUMIÈRE

LEDS-C4 fusionne l'innovation technologique avec l'art de la sculpture.

Renforcée, polie et vernie, la pierre d'Albâtre se combine parfaitement avec une illumination d'intérieur qui se veut chaude et accueillante, tout en offrant une multitude de possibilités d'application. Les caractéristiques translucides et particulières de ce matériau tamisent et estompent la lumière afin d'éviter l'effet parfois sec et froid de la lumière directe. Les veines et les eaux de chacune des pierres transforment chaque pièce en un objet unique tout en lui apportant une aspect luxueux, noble et chaleureux.

Le rigoureux processus développé par LEDS-C4 en vue de l'élaboration de la pierre d'Albâtre permet de disposer d'un matériau d'une qualité exceptionnelle et d'une grande noblesse. L'extraction se fait, en général, à ciel ouvert, à l'aide de systèmes non agressifs afin de protéger l'intégrité du matériau.

Les produits de ce catalogue, à l'instar de tous les produits de LEDS-C4, sont soumis à un rigoureux contrôle de qualité avalisé par les certifications **ISO 9001** et **ISO 14001**.

## NATURSTEIN ALS LICHTDIFFUSOR

LEDS-C4 vereint die technologische Innovation mit der Bildhauerkunst.

Der verstärkte, geschliffene und lackierte Alabasterstein, ausgestattet mit einem warmen Licht im Inneren, bietet zahlreiche Verwendungsmöglichkeiten. Die einzigartige charakteristische Transparenz von diesem Material mildert und verteilt das Licht, wodurch der Effekt von Härte und Kälte, die das direkte Licht austrahlt, eliminiert wird. Die Adern und Schattierungen von diesem Stein verwandeln jedes Stück in einzigartig und verleihen ihm ein prachtvolles, edles und warmes Aussehen.

Der von LEDS-C4 entwickelte, rigoreuse Verarbeitungsprozess des Alabastersteins verleiht diesem Material eine außerordentliche Qualität und Erlesenheit. Die Extraktion des Natursteins wird im Allgemeinen unter freiem Himmel, mit nicht aggressiven Systemen zum Schutz und zur Unversehrtheit des Materials, vorgenommen.

Die Produkte dieses Katalogs, wie alle Produkte von LEDS-C4, werden einer äußerst strengen Qualitätskontrolle unterworfen, garantiert durch das **ISO 9001** Zertifikat und die Sicherheit des Betriebssystems von LEDS-C4 wird durch das **ISO 14001** Zertifikat als umweltgeeignet bestätigt.

## LA PIETRA NATURALE COME DIFFUSORE DI LUCE

LEDS-C4 abbina l'innovazione tecnologica all'arte della scultura.

Rinforzata, pulita e verniciata, la pietra d'alabastro abbinata a una calda illuminazione interna, offre infinite possibilità d'applicazione. Le particolari caratteristiche translucide di questo materiale filtrano e sfumano la luce per eliminare l'effetto rigido e a volte freddo della luce diretta. Le venature e le filigrane rendono ogni pietra unica, con un aspetto di lusso, nobiltà e calore.

Il rigoroso processo adottato da LEDS-C4 per il trattamento della pietra d'alabastro consente di disporre di un materiale di qualità e peculiarità eccezionali. Pertanto, l'estrazione di effettua, in linea generale, a cielo aperto, con sistemi non aggressivi, in modo tale da proteggere l'integrità del materiale.

Il prodotti inclusi nel presente catalogo, così come tutti i prodotti di LEDS-C4, sono soggetti a un rigoroso controllo della qualità, avallato dalla certificazione **ISO 9001** e **ISO 14001**, che ratifica la garanzia del sistema di salvaguardia ambientale di LEDS-C4.
