With the Cygnis table lamp, our product designers followed the conceptual formulation to create a high-class table lamp with clean lines for a simple, elegant living style.

Together with modern LED technology Cygnis captivates with its purist elegant design and high functionality. The ultra flat 6W LED surface matches the clear, geometrical shaped lines and provides a clear, warm white light output. The switch of the 41 cm high, entirely aluminium produced designer lamp is included in the connection lead. With the integrated LED driver in the mains plug the lamp is ready for use with 230V.

MODUL

ELECTRO

EUTRAC®

Eutrac®-System

The 5-core Eutrac® surface track consists of an extruded aluminium profile which also functions as earth and two inserted plastic profiles carrying four embedded 2.5 mm² copper conductors. Any given profile can be easily cut to length on site. It is not necessary to cut back or bend back the conductors. The track has pre-punched oval holes and may be used within handreach.

C-TRACK®

Here are just a few possible application areas:

- Shelf with integrated lighting
- Display cabinet lighting
- Mirror lighting
- Indirect lighting
- Illuminated picture holder track

The unique space saving shelf-track system with integrated 12 volt track.

With the available modules, the user can very easily configure and assemble the C-Track®. In no time presentation areas and illumination are installed in one process. The low voltage technology is up to date and with the usage of normal 12 volt output current completely safe.

Even in the narrowest areas a specific illumination is possible. With a rotation of 90° the C-Track® spotlights can simply be clipped into any desirable place of the shelf track. Three types of spotlights are available for the individual light arrangement. They can be equipped with numerous available lamps.

The shelf holders are available in three different options and can be hung into any desirable position on the C-Track®. With their adjustable clamp range the wooden girders, glass bottom girder and cable bottom girders the presentation area can be easily arranged and hereby fitted to the respective product.

LIM[®] LIGHT IN MOTION

Extraordinary atmosphere can be created by coloured light using a multi-coloured lighting bank and light modules of the LIM[®] light systems.

Additive colour mixture, with 6 colour fluorescent lamps makes a simulation of various colour situations possible, from the neutral colour of daylight to any colour of light. Even the finest pastel shades with exceptional homogenous light distribution are no problem.

The LIM[®] lighting technology offers various application possibilities to you; in sales in presentation areas the light attraction with colour-changing ceilings and light banks provide a special feature. In business areas you can control the quantity of light and the

colour of light and light balance of whole office wings. In reception or hotel areas, as well as in the catering trade, you can create a stylish atmosphere with LIM[®] light elements. In medical practices and hospitals, the LIM[®] light system makes special lighting solutions possible; depending upon your desire for either more functionality or more atmosphere.

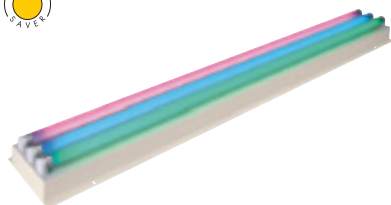

With an RGB masterlight bank a max. of 200 RGB slave light banks can be controlled. With the installation of the light bank, the maximum usage of the electrical circuit must be adhered to. (per 16 ampere electric circuit > 30 RGB slave light banks).

The LIM[®] RGB control console enables, together with the RGB light banks and/or RGB master light module, the control and calling up of the light colour and light level by a key stroke. Also, dynamic sequences, with programmable light scenes are possible due to selectable pause and change-over times. 4 different sequencing programs with 8 light scenes each are already stored in the system. Further features are: panic circuit, external switching entry and variable time intervals. It is a straight forward system, does not require prior knowledge & easily operated by the end user.

LIM[®] RGB MASTER LIGHT MODULE 3x 36W Design by CDC

230~

Socket/Lamp:
G13/T8 (incl.)
1x red, green, blue
3x 36W

Material:
Steel

Dimensions:

Accessories/Included parts:
3 Electronic ballast (incl.)

Versions:
Master module **with** integrated
signal converter 1-10V and control
panel 158020

Slave module **without** signal
converter. for control voltage 1-10V
158021

Multicolour-light modules with particularly homogenous light emission for the universal application in light walls through simple surface fitting and lighting up a diffuser wall mounted at a distance.

Depending on application, this distance can vary between 20 cm or more.
The applied lamps must be from the same manufacturer and be burned in for 100 hours at full

100% brightness to guarantee an equal colour distribution and quality.
A data sheet can be sent on request.

The BookLED shelf light offers your library illumination and stableness in one. BookLED can be optionally operated with the head folding out, downwards or upwards. It only takes a few screws to be loosened, to pull the insert out of the housing, which allows it to be turned around 180°. Also the base plate offers flexible application possibilities as it can be fastened separately. It can be optionally fastened to protrude either to the left or right.

In closed position the transparent switch gives off a warm white LED illumination. By pressing the switch you will unlock the head which can then be pulled out. At the same time the position illumination is switched to the with 3 Power LEDs equipped, 350° rotatable head.

RUSTY

RUSTY CONE

RUSTY

The idea behind our Rusty lamp was to connect the natural aspect of a controlled surface rusting with modern energy saving technology in a very strong light fixture. All lamps of the Rusty range are made of Cor-ten cast steel and are extremely weather proof. In the outdoor application the special steel alloy forms a special barrier layer of iron oxide (rust), which protects the material core from infiltration of dampness and thereby protecting it from further rusting.

The flaking of the rust is hereby prevented. Individual deviations in form and surface are intended with the Rusty lamps. Each unit is unique.

Rusting is a natural process; type and colour of the outer oxidation layer can, depending on location and influence of weather, develop differently and thereby make the sensual attractiveness of this lamp. Rusty lamps materialize a bit of liveliness and individuality. While the appearance of the round Rusty lamps resemble harbour bollards, the Rusty Square builds a visual relation to classical Japanese garden architecture. This relationship is not by coincidence, especially in Japan the cultivation and aesthetic of the perishability has a long tradition. Hereby the Rusty Square, a individual unique and changing in the course of time appearance through the rust process is a suitable counterpart for the Japanese style.

Youngest members of the Rusty family are Rusty Slot and Rusty Cone.

Dimensions:
H: 50 cm

Accessories/Included parts:
Screws (incl.)

Note:
For floor lamps of the Trust, Nails and Big Nails range.

MODUL
ELECTRO
www.modulelectro.ru

The image shows two sleek, modern outdoor lamps with curved poles and glowing light fixtures. They are positioned on either side of a stone-paved path that leads into a dark, wooded area at night. The path is made of irregular, light-colored stones. The surrounding area is lush with green grass and various plants. In the background, a large tree trunk is visible, and a small structure with a corrugated metal roof can be seen through the trees. The overall scene is dimly lit, with the primary light source being the two lamps, which cast a warm, yellow glow.

VANO RGB Design by CDC

Socket/Lamp:
G5/T5 energy saver (excl.)
3x 35W

Material:
Aluminium

Dimensions:
W/H/D: 156/10/11 cm

Accessories/Included parts:
Electronic ballast (incl.)
Holder (excl.)

Note:
Optimal operation of the lamp
by ta +10°C till +40°C.
Below +10°C only operable
with 100%. From +10°C dimma-
ble. Controllable with LIM2®
controller (470531).

Versions:
silver grey

229401

With a LIM2® controller 200 Vano RGB can be controlled. When installing the controller please adhere to the maximum allocation of the power circuits (per 16 Amp-power circuit up to 30 Vano RGB.) The used lamps must be identical and from the same manufacturer to provide a uniform colour distribution. A data sheet can be sent to you on request.

LIM2® CONTROLLER Design by CDC

Control voltage:
1-10V

Material:
Aluminium/plastic

Dimensions:
W/H/D: 11.7/3.7/9.7 cm

Accessories/Included parts:
Flush mount housing (incl.)

Note:
LC-Display.
Flush mount possible.
Short circuit protected!
Can also be controlled by remo-
te control (470530) page 638.

Versions:
alu natural

470531

The LIM2® 4-Channel Controller makes setting and calling up of coloured light or light levels possible on keystrokes. Four groups of lights with digital operating devices for a control voltage of 1-10V (eg: fluorescent lamps, low-voltage halogen, high-voltage halogen lamps or LED applications) can be controlled. Four pre-programmed sequences can be easily called up. Also a dynamic operational sequence of the setup light scenes is possible owing to selectable standing and blend over times. Four different sequencing programs with 8 light scenes each, are already programmed in the system. Further features are panic configuration, external switching entrance and variable time intervals. It is an easy to use system, whereby no prior knowledge is needed to operate it.

LED STRIPS

Due to production methods, the colour of LEDs can vary. The listed values for colour and watts are typical average values. We do our best to deliver every shipment with the same colour selection. We cannot guarantee follow-up orders will have the same values. Detailed technical data sheets on LED strips can be obtained on request.

transfo light colour

A Buddha statue is centered within a stone archway. The statue is dark, possibly black or dark brown, and is seated on a tiered white pedestal. The archway is made of light-colored stone blocks and is illuminated from within, creating a warm, golden glow. The background behind the arch is a solid dark green color. Overlaid on the center of the image is the logo for 'MODUL ELECTRO' and the website address 'www.modulelectro.ru'. The logo consists of the word 'MODUL' in large, bold, orange letters, with 'ELECTRO' in smaller, orange letters below it. The website address is in white text below the logo. The logo is flanked by two square symbols, each containing a smaller square.

LIM®

Material:
Aluminium/plastic

Dimensions:
W/H/D: 11.7/3.7/9.7 cm

Accessories/Included parts:
Flush mount housing (incl.)
IR- receiver (on front of housing)

Note:
4x 1-10V control voltage
with LCD-display
optionally controllable via remote control.
Flush mount possible.
Short circuit proof.

Versions:
alu natural

470531

The LIM2® 4-Channel controller makes setting and calling up of colour of light or light level possible on keystrokes. Four groups of lights with digital operating devices for a control voltage of 1-10 V (eg. fluorescent lamps, low-voltage halogen, high volt halogen lamps or LED applications) can be controlled. Four pre-programmed sequences can also be called up by keystrokes. Also a dynamic operational sequence of the setup light scenes is possible owing to selectable standing and blend over times. Four different sequencing programs with eight light scenes each are already programmed in the system. Further features are panic configuration, external switching entrance, variable time intervals. It is a easy to use system, whereby no prior knowledge is needed to operate it.

REMOTE CONTROL for LIM2® controller

2x
AA 1.5V

LIM®

Dimensions:
L/W/H: 17.8/4.3/2 cm

Accessories/Included parts:
Batteries (excl.)

POWER LIM® RGB MASTER CONTROLLER 24V=

Specification:
Power output 20W/channel
60W max.

Dimensions:
L/W/H: 18.5/13/3.5 cm

Accessories/Included parts:
Integrated power unit (incl.)

Versions:
24V= 470521

Note:
Optionally with remote control (470520).
For LED products with 24V= constant voltage.

The Power LIM® master controller 24V= is suited for RGB LED Strip Outdoor (229813) RGB LED Strip (550320). RGB Flex LED Roll (550433) and IP55 LED Flexstrip (229793). Extendable up to 9 slave controllers, 3 fixed programs. Each colour can be dimmed via a push-button. Easy to use.

POWER LIM® RGB SLAVE CONTROLLER 24V=

Specification:
Power output 20W/channel
60W max.

Dimensions:
L/W/H: 18.5/13/3.5 cm

Accessories/Included parts:
Integrated power unit (incl.)
1.2 m control lead to connect to the master controller (incl.)

Versions:
24V= 470522

Note:
To extend the master controller (470521).
For LED products with 24V=constant voltage

REMOTE CONTROL for Power LIM® Master controller

2x AA 1.5V 0.09

Dimensions:
L/W/H: 17.8/4.8/1.9 cm

Accessories/Included parts:
Batteries (excl).
IR-receiver (incl)

Versions:
Receiver 470520

Note:
Suitable for Power LIM® master controller (470521 and 470523).
Infrared remote control to steer the RGB master controller (470521 and 470523).

POWER LIM® RGB MASTER CONTROLLER 350mA

230V 350mA 0.8

Specification:
Power output 7W/channel.
21W max.

Dimensions:
L/W/H: 18.5/13/3.5 cm

Accessories/Included parts:
Power unit (incl.)
Optionally with remote control (470520).

Versions:
350mA 470523

Note:
For 1W PowerLED

Power LIM® master controller with integrated power unit. Suitable to operate PowerLED with 350mA constant voltage. Eg. connection of up to max. 5 RGB LED frames (111263). Extendable with up to 9 slave controllers 470524, whereby the first two slave units can use the 24V power supply of the mastercontroller. 3 fixed programs selectable and one static colour receivable via a button.

POWER LIM® RGB SLAVE CONTROLLER 350mA/21.3W

24V 350mA 0.25

Dimensions:
L/W/H: 17.5/7.8/3.5 cm

Accessories/Included parts:
Power unit (excl.)
1.2 m control lead for connection to the master controller (incl.)

Versions:
350mA 470524

Note:
To extend the master controller (470523) For PowerLED with 350mA constant voltage, max. 5x 1W PowerLED per channel, eg. connection of max. 5 RGB LED Frames (111263).

LED DRIVER 3W 350mA

Specification:
Output 3W max.
Output power 320mA

Dimensions:
L/W/H: 5.5/4/2 cm

Note:
For the connection of up to 3 PowerLEDs 350mA, With stress relief. Fits in connection box (229260) see page 652.

Versions:

All illustrated electronic transformers are safety transformers in compact build. They are protected against overload and short circuit.

These transformers can be used in combination with a resistive/trailing edge dimmer.
Please pay attention to the manufacturers guidelines.

Please note:

The secondary cable of an electronic transformer must never exceed 2 metres, otherwise it can cause emission interference.

Electronic transformers are not suitable for wire systems.

ENERGY PACK

230~

IP54

Dimensions:
L/W/H: 35/12/12 cm
Earth spike-L: 50 cm

Accessories/Included parts:
Earth spike (incl.)
Mounting screws (incl.)

Note:
4 earthed plugs 230V/16A max. with flip lid.
3 outlets for metrical cable glands according to EN 50262 M 12 (cable-Ø: 9-17 mm).
1 entry for metrical cable gland according to EN 50262 M 25 (cable-Ø: 9-17 mm).
Transformers not suited for outdoor applications can be placed in the energy pack.

Versions:
Energy pack 227000

8-CHANNEL TRANSMITTER

12~

Dimensions:
L/W/H: 7.8/4.1/1.4 cm

Accessories/Included parts:
Batteries (incl.)

Note:
For max. two 4-channel receivers (410850 see below).
Range outdoor: approx. 50 m.
Range indoor: approx. 30 m.
Encoding free selectable.

Versions:
black 410851

4-CHANNEL RECEIVER

230~

IP54

Dimensions:
L/W/H: 12.1/8/5.9 cm

Note:
Max. load per channel 900W.
2 closer contacts and 2 changing contacts.
Encoding free selectable.

Versions:
light grey 410850

DIMMER MODULE DODI

230~

Dimensions:
L/W/H: 1.5/4/5 cm

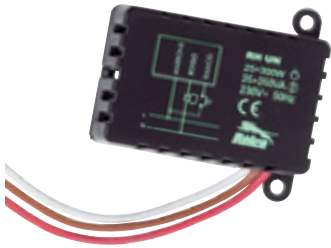

Note:
The dimmer module Dodi can not be used in combination with electronic transformers!

Note:
The dimmer module Dodi is a phase leading edge dimmer to be fitted in a junction box. It has an output of 60-500W and is suitable for inductive/ohmic loads. Incl. soft start for extended life lamp time. The dimmer is controlled via a wall push button.

Versions:
410120

DIMMER MODULE RHUN

230~

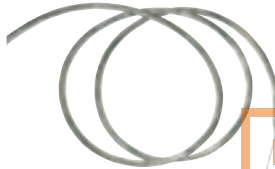

Dimensions:
L/W/H: 5/3.2/2 cm

Note:
The dimmer module Rhun is a phase leading edge dimmer to be fitted in a junction box. It has an output of 40-300W and suited for inductive/ohmic loads. Incl. soft start for extended life lamp time. The dimmer is controlled via a wall push button.

LAMPS

- The specification of the energy efficiency class for the respective lamp is marked with EEK and the corresponding category value in the table.
- The light technical properties of lamps are marked with Lumen (lm) for free radiating lamps and in Candela (cd) for reflector lamps. the colour rendering property is expressed through the Index Ra.
- For the application of IRC or energy saver lamps the maximum output of the Lamp must be noted and that of a standard equivalent lamp. Tables can be found next to the lamps.
Example: A lamp with max. 50 standard lamp can only allowed to be equipped with a 35W energy saver lamp!
- All halogen metal halide lamps, energy saver lamp, . LED lamps, halogen metal halide lamp, . LED lamps, fluorescent lamps and compact fluorescent lamps must be seperately disposed of and do not belong in domestic rubbish!

Halogen Precise ConstantColor MR16

From the founder of halogen light: GE Precise MR16 ConstantColor

- Through ConstantColor coating a 98% luminous intensity preservation is given for the entire life span.
- Excellent colour rendering.
- Extreme high life span on up to 6,000 hours.
- No shadow to the rear through double sided reflector coating.
- Minor light loss on the rear side of reflector.
- Brilliant, white light (3050 K) throughout the entire life span through Xenon quartz burner.
- Consistent bright light cone without any colour interference on the edges.
- Exact positioned burner in the reflector for largest possible light yield.
- UV control.

CMH Precise MR16 GX10

less is more... CMH Precise MR16

www.modul-electronic.com

- Formidable efficiency - 2 to 3 times better than halogen lamps.
- 10,000 - 12,000 hours life span - up to 6 times longer than halogen lamps.
- Robust GX10 socket for simple mounting in the lamp.
- 3 emitting angles (12°- 25°- 40°) and 2 light colours (830, 930, 942 Kelvin) allow a high degree of artistic freedom.
- Durable, reliable and best colour rendering for many applications.
- Minor lumen loss and constant, brilliant light colour throughout the life span.
- UV filter reduces fading and flaking of plastic.

CMH-TC ConstantColor™ SuperMini GU6.5 20W, 35W

Socket/Lamp:
GU6.5/HIT-CE halogen metal halide lamp with ceramic burner-technology. 20/35W

Dimensions:
Product-Ø/H: 1.45/5.2 cm

Note:
Ceramic burner for high constant colour during entire life span.

Versions:					
20W	3000K	1615lm	Ra80+	507020	
35W	3000K	3400lm	Ra80+	507030	
35W	4200K	3400lm	Ra90	507031	

less is more ... CMH SuperMini

- smallest ceramic halogen metal halide lamp from GE lighting.
- Reliable 3-part discharge tube of the 2nd generation.
- Robust GU6.5 twist & lock socket guarantees an exact positioning of the lamp in the reflector.
- 4.5 times higher lumen (1615 lm) than a comparable 20W halogen lamp means higher energy cost saving.
- 6 times longer life span (up to 12000 hours) than a comparable halogen lamp.
- Minor lumen drop and constant brilliant light colour over the entire lifespan.
- Excellent colour rendering 20W >Ra80 and 35W >Ra90.
- UV Filter reduces bleaching and flaking of plastics.

MICROLYNX 6W

230~

Socket/Lamp:
GX53/energy saver lamp
6W

Dimensions:
Ø/H: 7.5/2.1 cm

Accessories/Included parts:
Electronic ballast (incl.)

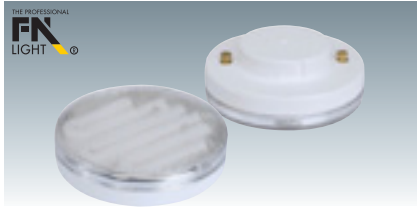

Note:
Direct current operation possible!

Versions:

6W	3000K	220lm	EEK=B	508421
6W	4000K	220lm	EEK=B	508422

GX53 9W

230~

Socket/Lamp:
GX53/energy saver lamp
9W

Dimensions:
Ø/H: 7.5/2.7 cm

Accessories/Included parts:
Electronic ballast (incl.)

Note:
Direct current operation **not** possible!

Versions:

9W	2700K	260lm		508860
9W	4200K	260lm		508861

SHOPLIGHT GX53 111mm

230~

Socket/Lamp:
GX53/energy saver lamp
11W

Dimensions:
Ø/H: 11.1/5.5 cm

Accessories/Included parts:
Electronic ballast (incl.)

Note:
Reflector lamp

Versions:

11W	3000K	400cd	Ra80	508550
11W	4000K	400cd	Ra80	508551

ENERGY SAVER LAMP GU10 7W, 9W, 11W

230~

Socket/Lamp:
GU10/energy saver lamp
7-9-11W

Dimensions:
Ø/L: 5/7.6 cm

Accessories/Included parts:
Electronic ballast (incl.)

Note:
Because of the housing dimensions of this lamp it cannot be used in all GU10 lamps. Information can be obtained from our sales team.

safety classe one-two-three	
------------------------------------	--

Indication of application area		IP44
suitable only for indoor applications not suitable for indoor applications suitable for outdoor applications, IP classification		

indication application area	
telescope clamp stick ceiling - wall - ground/flush mount - recessed additional accessories are needed to mount the lamp	

turning range of the product with degree indication		340°
--	--	------

swivel range of the product with degree indication		180°
---	--	------

height adjustability and pendulum cable length		1,5 m
height adjustability for Jojo lamp pendulum cable length by normal pendulum lamp		

indication to max. wire spacing in cm		20
--	--	----

shape of fitting opening		12,5/12,5	72
measurements in cm			

fitting depth		9,5
measurements in cm		

weight of product in kg		9,5
--------------------------------	--	-----

max. lead cross-section		max. 2,5 mm ²
--------------------------------	--	-----------------------------

indicates the cable cross-section		7-12
measurements in mm		

throughwiring		max. 10
throughwiring possible throughwiring possible until illustrated number of lamps		

impact resistance of product till indicated value		20 J
--	--	------

weight capacity of product		0,8 t
capacity till indicated value. Measurement is based on fitting in concrete		

heat development on the surface of ground recessed spot		90°C
--	--	------

temperature fuse with temperature indication		115°C
---	--	-------

independant converter	
(electronic transformer can also be used externally)	

detail to mounting with LED		LED 35 pcs.

photometric data	
a photometric curve of respective product can be sent to you on request	

bulb/lamp part cardanic swivelable		60°
cardanic swivelable cardanic swivelable till indicated value in degrees.		

bulb suited for	
the application in lamps with safety glass the application in lamps without safety glass	

bulb is equipped with UV-protection	
--	--

indicates the average life span of a bulb in hours		2500
for GE bulbs: indicates the average maximum life span of a bulb		

emitting angle		50°	15°-30°	40°	70°
symmetrical focussable asymmetrical					

properties of reflector bulbs	
multi mirror bulb (cool beam): The main heat is distributed to the rear side of the reflector - reduced heat capacity of the light bundle.	
direct mirror bulbs (no cool beam): The heat capacity is in the light bundle, therefore almost no heat development on the rear side of the reflector.	

short circuit proof **safety transformer**

electromagnetic compatibility

product has been test for it's **electromagnetic compatibility** by the VDE (radio protected sign).

protected by more than 110°C in fault

product **VDE tested**

mounting on materials

allows the mounting of the lamp on materials (ex: wood) with unknown inflammation behaviour

product **TÜV-/GS tested**

fastening on normal inflammable surfaces

suitable for the direct fixation (valid - unless otherwise specified - for all products illustrated in this catalogue)

not suitable for the direct fixation

not suitable when using bulbs >50W

product **KEMA tested** (Netherlands)

highly efficient **prof. lamp** for commercial applications

produkt **Nemco tested** (Norway)

this lamp is equipped with energy saving **LED technique**

product **Semco tested** (Sweden)

this lamp can be operated with **energy saving bulbs**

product **ENEC tested**

(Indicates the norm conformity with european safety norms)

LED:

Due to production technical reasons the light colour of LED's amongst each other can differ. The value for light colour and lumen, where indicated, are typical average. We strive to carry out every order with the same colour selection. However, for follow-up orders we cannot guarantee the same colour selection. Detailed technical data sheets on LED strips are available on request.

Power LEDs place increased demands on the power consistence and should therefore only be operated with constant power sources. If several LEDs are connected, they must be connected in series. A parallel connection is not permitted. Please note also the installation sequence, so that the LEDs are not temporarily exposed to high currents and thus getting damaged. In principle: first completely connect the secondary electric circuit (LEDs to Driver) and then connect the primary electric circuit (Driver to the power).

stainless steel 304:

(1.4301) a good corrosion resistance for natural environmental media (water, municipal and rural atmosphere) with the absence of significant chlorine - and salt concentration. 14301 is however not suitable for applications where contact is made with the sea respective sea water or a salty atmosphere. It is also not suitable for applications in swimming pools or resemblance.

stainless steel 316:

(1.4404) for natural environmental media (water, municipal and rural atmosphere) as well as industrial areas with moderate chlorine and salt concentration, for the food and pharmaceutical industry and for the rural food sector 1.4404 shows an excellent corrosion resistance. 1.4404 is not saltwater proof.

Please note:

A large part of the products presented in this catalogue are protected by registered trade marks, design patents, utility models or patents. An offence against the patent rights or a useage of text and layout without our permission will be legally pursued. All products of our assortment are subject to a strict quality inspection & fulfill the general valid standards (CE). The illustrations and data contained in this catalogue are only for illustration and are noncommittal in colour, form, execution and technical data. All weight and length specifications are indicated in kg and/or in cm, if not differently designated. Products marked with ▼ are available in limited quantities and may not be available during the entire validity of catalogues.

The presentation of our lights with realistic and exemplary application photos is made possible by the friendly compliancy and consent of the owners or designers of the surroundings seen in the foreground of the pictures.

Again we would like to thank everyone who contributed with consent to the appearance and to the use of our photos.
